The famous little pills.

IN HUB MARKETS

Quotations on the Leading Products in Demand

Boston, June 7.—Prices on butter sagged off a little, under the influence of easier markets in New York and the west. The new quotations are: Choice northern creamery, 21¢@22¢; western, 20¢@21¢; Vermont dairy, 18¢@19¢.

Cheese has strengthened up a little on new stock, in sympathy with a firmer market in the country, and the best grades are materially higher. York state, 13¢@14¢; Vermont twins, 12¢@13¢; new cheese, 10¢@11¢.

Eggs are very firm, and though the receipts are still large, the demand is sufficiently active to keep current stocks well down. The cold storage people are taking a good many eggs for storage. Choice henry and nearby, 21¢@22¢; eastern, 19¢@20¢; western, 17¢@18¢.

All things considered, business is fairly good in the local wholesale fruit and vegetable market. Strawberries have not been coming forward very fast, and under a good demand, very ordinary lots have fetched comparatively high prices. A few peaches have been received, but they have been generally poor and too green to sell readily.

Watermelons are now in the market, but they are high and the call for them is limited. Muskmelons are in fairly good supply, but the demand is small. The market for apples does not change much. Bakers are taking a good many, and there seems to be a slightly firmer feeling, and lots which it was hard to dispose of \$4.50 a barrel were sold during the past week as high as \$5.

Receipts are small, and dealers have had to take out of their cold storage holdings. But few northern spies are in the open market and quotations are for those in storage. Grapefruit are quiet, steady and unchanged. Cherries are slightly firmer.

The movement of vegetables has been decidedly better than that of fruits. Farm and garden truck, with the exception of asparagus, is fairly plenty and reasonable. Receipts of asparagus have been small and with a steady demand as high as \$8 a box has been obtained on fancy, large stock. Cabbages have been coming forward freely and going out fast at low figures. Cucumbers are in good request, and as they are not over plenty they bring good prices. Onions are moving better and they have gone up a little. Green peas and string beans are lower under increased arrivals.

Potatoes—Arrostopok Green mountains, 93¢@95¢ a bushel; Hebrons, 93¢@95¢; Prince Edward Island stock, 75¢@80¢; new southern stock, \$5.50@6.50 a barrel; sweets, North Carolina, \$2 a barrel.

Asparagus—Native, extra large, \$8@8 a box; common to good, \$4.50@5.50.

Beans—Southern string beans, green, \$2.50@3.50 a crate; wax, \$2.50@3.50.

Cabbages—New southern, \$1.75@2 a crate.

Celery—California, \$2 a dozen bunches.

Cucumbers—Native bothouse, No. 1, \$1 a box; No. 2, \$2@2.50; Floridas, \$1.50@1.75 a basket.

Greens—Spinach, 10¢@20¢ a bushel; kale, 25¢@35¢ a bushel; dandelions, 6¢@7¢ a bushel.

Lettuce, etc.—Lettuce, 25¢ a box; romaine, \$1 a dozen heads; parsley, \$1.50@1.50 a bushel; watercress, southern, 35¢ a dozen bunches; mint, 25¢ a dozen bunches.

Onions—Texas, yellow, \$1.50 a crate; white, \$1.75 a crate; Egyptians, \$2@2.25 a 2-bushel bag; bunch onions, 40¢@60¢ a box; leeks, \$1.25 a dozen bunches.

Squashes—Native, 35¢@40¢ a box. Rhubarb—Florida, white, \$1.50@3.50 a package; marrow, \$3 a crate.

Tomatoes—Native bothouse, 15¢@20¢ a pound; southern, \$3@4 a crate.

Turnips—Yellow, \$4 a bag; French white, \$4 a bag; bunch turnips, 85¢@1 a dozen bunches.

Miscellaneous—Peas, southern, \$1.50@1.75 a basket; carrots, \$1.50@1.75 a bushel; new bunch carrots, 60¢ a dozen bunches; parsnips, \$1.25@2 a bushel; radishes, 35¢@50¢ a box; beets, \$1.25 a bushel; new bunch beets, 55¢@81 a dozen bunches; peppers, \$2.50@3 a crate; eggplants, \$3@3.50 a crate; okra, \$2 a crate; mushrooms, \$3@4 a basket; Florida cauliflowers, \$2 a basket.

Apples—Baldwins fancy, \$4.50@5 a barrel; No. 2, \$3@3.50; russets, No. 1 Roxbury, \$4@4.75; No. 2, \$3@3.50; Ben Davis, \$4@4.50; northern spies, \$4.50@5.50.

Strawberries—Jersey, 12¢@15¢ a quart; Delaware, 11¢@18¢; Maryland, 10¢@15¢; Baltimore, 10¢@12¢.

Muskmelons—Floridas, fancy, \$4@4.25 a crate; common to good, \$3@3.50.

Watermelons—Florida, 60¢@65¢ each. Cherries—California, \$2.25@3 an 8-lb box.

Some slight advances were made in pork provisions, but the general tendency of prices has been downward, especially on lard.

There is a little firmer feeling in the market for fresh beef. The quotations are: Extra heavy sides, 7½¢@7.34¢; good, 7.14¢@7.4¢; light, 6.34¢@7¢; heavy hinds, 9.34¢@10¢; good, 9.14¢@9.94¢; light, 8.34¢@9¢; heavy fores, 5.14¢@5.94¢; good, 5.5¢@5.14¢; light, 4.34¢@5¢.

A very firm market is reported for lambs and yearlings and muttons and veals are steady. Kentucky springers, 15¢@16¢; fall lambs, 11¢@12¢; yearlings, 9¢@11¢; muttons, 9¢@11¢; veals, 11¢@12¢.

Poultry is steady. Western frozen turkeys, 19¢@20¢; native roasting chickens, 28¢@30¢; large frozen western chickens, 12¢@14¢; northern fowls, 15¢@16¢; western fowls, 13¢@13½¢; western capons, 16¢@18¢; native broilers, 32¢@35¢.

Offerings of hay continue light. Straw is firmly held, with the supply still small; millfeed is barely steady. Hay, No. 1, \$19@20; low grades, \$15@17; rye straw, prime, 15¢; oat straw, \$9.50@10.

HOUSEHOLD.

HEALTH HINTS.

There are numerous diseases which are the results of errors in diet and some of them may be corrected by changing the diet, avoiding such foods as disagree and taking those that are known to be beneficial. The mineral elements that we need for the growth and repair of our bodies are obtained mainly from the vegetable kingdom.

It is said that only vegetable minerals should enter into the digestive tract, and that it would be better for most people to eat less meat. The various vegetables yield a sufficient amount of minerals for the support of the body if used with intelligence.

The onion gives us sulphur; beets, carrots and spinach contain iron; wheat, corn, cabbage, cauliflower, radishes and parsnips yield phosphate, and calomel is obtained from the tomato. The daily diet should at all seasons include a plentiful supply and good variety of vegetables.

The old-fashioned New England boiled dinner, which many can remember with regret that its like is seldom tasted now, was a most healthful and nutritive combination of vegetables.

The general practice of farmers of raising a good supply of all vegetables and storing them in dry, well ventilated cellars is a wise provision for the needs of the body throughout the year.

The importance of regular habits in the promotion and preservation of health is of the greatest importance. One of the advantages of the life of clerks, factory hands, etc., over that of the farmer is that regularity in eating is practiced by those who are obliged to begin work at a given time and end with a stroke of the bell.

It is related of a delicate girl who was compelled by circumstances to earn her living that she went to work in a store. Her friends warned her that such a life would be the worst thing possible for her health and it was generally believed that she would live but a very short time. Contrary to expectations, however, her health began to improve and she is today alive and well and enjoys a hearty laugh over the doleful predictions of her friends.

She attributes her improvement to the regularity of life which she was obliged to practice as a clerk. Before entering upon her work she had no system about her habits, but in her new position it was necessary for her to rise, eat, retire and live by fixed rules. Besides this, the work diverted her mind from herself and in many cases this is of the greatest benefit. Women on the farm should insist as far as possible upon regularity in meals, and thereby they will do much for the good of themselves and their families.

Eating, sleeping and working irregularly is almost sure to break down the health in time, as it may bring on stomach derangements of the most serious nature.—Mirror and Farmer.

How to Dust.

When you sweep a room raise as little dust as possible, because this dust when breathed irritates the nose and throat and may set up catarrh. Some of the dust breathed in dusty air reaches the lungs, making parts of them black and hard and useless.

If the dust in the air you breathe contains the germs of consumption—tubercle bacilli—you run the risk of getting consumption yourself, says the Pittsburg Press.

To prevent making a great dust in sweeping, use moist sawdust on bare floors. When the room is carpeted, moisten a newspaper and tear it into small scraps and scatter these upon the carpet where you begin sweeping.

As you sweep, brush the papers along by the broom and they will catch most of the dust and hold it fast, just as the sawdust does on bare floors. Do not have either the paper or the sawdust dripping wet, only moist.

In dusting a room, do not use a feather duster, because this does not remove the dust from the room, but only brushes it into the air so that you breathe it in; or it settles down and then you have to do the work over again.

Use soft, dry cloths to dust with and shake them frequently out of the window, or use slightly moistened cloths and rinse them out in water when you have finished. In this way you get the dust out of the room.

In cleaning rooms you should remember that dust settles upon the floor as well as on the furniture, and is stirred into the air we breathe by walking over them.

You can easily remove all this dust in rooms which have bare floors, in houses, stores, schoolrooms, etc., after the dust has settled, by passing over the floor a mop which has been wrung out so as to be only moist, not dripping wet.

The sincerest tribute that can be paid to superiority is imitation. The many imitations of DeWitt's Little Early Risers are now before the public prove it the best. Ask for DeWitt's. Good for burns, scalds, chafed skin, eczema, tetter, cuts, bruises, boils and piles. Highly recommended and reliable. Sold by Fred D. Pierce, Barton, F. J. Kinney, Barton, Landing.

EARLY FIRE IMPLEMENTS.

Appliances Used in This Country in the Seventeenth Century.

Undoubtedly the first fire company organized in this country was formed in New York in 1658. It was called the Prowlers and was composed of eight men, with 250 buckets, hooks and small ladders. Where the buckets were obtained and whether or not they were in addition to those owned by the town the records fail to state. In 1679 Salem purchased two or three dozen cedar buckets, besides hooks and other implements; also the selectmen and two others were authorized to take command at fires and to blow up and pull down buildings when such action was necessary.

This practice appears to have been much more common before the use of engines than afterward. Boston on Sept. 9, 1679, ordered that every quarter of the town should be provided with twenty swobes, two scoops and six axes. The swobes, or swabs, as they are now called, were long handled mops that could be used to put out roof fires. The general use of swabs has long since disappeared, but when a slight blaze is beyond the reach of a pail of water and more improved apparatus is not at hand a long handled mop is today the most efficient article to be used. In Japan these swabs may be seen on many roof tops.

In 1690 New York ordered that five ladders and also hooks be made. In Philadelphia no mention is made of public precaution against fire until 1696, when a law was passed forbidding the firing of chimneys or allowing the same to become foul. Each house was to have a swab, bucket or pail. Another act was passed in 1700 ordering every household to have two leather buckets. In the following year six or eight hooks for the purpose of tearing down houses were ordered to be made.

BINDING THE FEET.

This Queer Chinese Custom Is a Comparatively Modern One.

China's custom of binding the feet of its women is not as ancient as has been supposed. A correspondent of one of the native Chinese papers quotes from the letters of Yuan Mei, who lived in the eighteenth century. In one of his letters Yuan Mei wrote to a friend: "You ask me to get you a handsome wife and ardently desire, as your first requisite, that she shall have small feet. Surely you cannot be one who admires true beauty. An admirer of true beauty has his own individual tastes, disinclined to follow the dictates of others. Our ancient literature, in both prose and poetry, has many allusions in praise of beautiful women, but in no instance touches upon small feet."

A work treating of the customs of the Sung dynasty by Shen Yo says a man's well made shoes are said to be square, and a woman's round, at the toe. In the Tang dynasty, the first allusion to the feet of Yang Kwei Fei, the court beauty, was about her silk stockings. In one of Han Tung Lang's poems, referring to a woman's feet, he says, "Her six inch feet so bright and sleek." These allusions clearly point to unbound feet.

Yuan Mei's letter concludes by saying that the taste of those who ignore the beauty of face and form is depraved. He laments that sensible men should be so led away by a foolish fashion.

Yuan Mei's letter concludes by saying that the taste of those who ignore the beauty of face and form is depraved. He laments that sensible men should be so led away by a foolish fashion.

FARM

Three Miles from No. Crafts' ury Village, Six Miles from Albany Village, To Be Sold At A Bargain.

For the purpose of closing up a transaction in which several parties are interested, the place known as the "Charles Adams Farm" in the east part of Eden will be sold. It contains 280 acres of land divided about as follows:

Slightly across meadow and tillage, 100 acres pasture, 100 acres woodland. The dwelling house is not in first-class condition. It is of fair size with two and a half stories and is very pleasantly located. There are two barns and a well which are in good condition. The horse barn is 26x36, the main barn is 36x46, with stables practically new. 20x30. There is a manure basement under the main barn. There is excellent running water at both house and barn. There is a good sugar orchard of 400 trees, also an apple orchard of about 50 trees. The farm cuts 800 tons of hay and has ample pasturage for as much stock as the farm will winter. It is within 1 mile of the schoolhouse, 3.12 miles from South Craftsbury, 8 miles from North Craftsbury, 11 miles from Wolcott, 5 miles from North Wolcott, 6 miles from Albany, 4 miles from Eden Mills, 14 miles from Morrisville and 14 miles from Hyde Park. The farm is in good state of cultivation and it is not known that any hay has been sold therefrom for many years. The soil is strong and especially adapted to grain.

The most attractive feature of the whole matter is the price asked therefor, and the terms of payment. The entire property would be sold for \$1600, of which sum \$800 may be paid down or satisfactorily secured and, with proper restrictions as to cutting of timber and selling of the crops, the balance may be paid in installments of \$600 per year for two years and then \$200 per year for the next six years.

Parties wishing to examine the farm may call on L. V. Brown, Esq., whose residence is only a few rods from the dwelling on the farm offered for sale. He knows all about the premises and will answer any questions concerning same.

Some idea of the desirability of this farm may be gained from the fact that the pasture rented for \$80 last season while the hay crop was sold for \$150 standing and is to be fed out on the premises, indeed is being now fed out and the manure goes with the farm. There is not much soft wood stumpage on the premises, but there is a large amount of hardwood, which would sell for good price, as the farm is only 1½ miles from one of the best sawmills in Vermont.

My stock consists of all new fresh, clean, goods and this sale will mean a great saving in cost of goods to you. During this sale our stock of groceries will be kept up full and complete and will make prices on these goods that will make it an object for you to buy groceries here, will have some special bargains in TEAS. I have several kinds and over 1000 lbs. in stock. Good fresh eggs taken in exchange for goods, prices made during this sale will be strictly for cash.

A. H. GARDYNE, BROWNINGTON CENTER, May 23, 1906. VERMONT 22 tf.

The Davis Store at Glover calls your attention to these important Facts.

That they have just unloaded a car of that nice Gilt Edge Flour.

That they are selling 4 cans corn for 25c.

4 " salmon for 25c.

That they have a supply of Sanford and Leaming corn. That the line of shoes has never been as complete. As a special bargain we will mention a lot of ladies oxfords at 89c per pair.

That they have that shirtwaist, belt and collar or a shirtwaist suit that you need for this kind of weather.

That they are paying the highest prices for
